Instructions to run

The following steps are to be followed to run the application:

1. Run "ensemble.ipynb" . It generates sentiment labels for the data in "out.csv" and stores in "test.csv".
2. Run "Analysis.ipynb". It analyzes data in "train.csv".
3. Run "model.ipynb". It trains on "train.csv" and extracts the selected text from "test.csv". This is stored in "predictions.csv".
